

FORKLIFT SAFETY AT WORKPLACE

Part of the compliance of the Occupational Safety & Health Act 1994 is the training of personnel involve in the use of material handling equipment. A Forklift is highly powered industrial machinery, which needs to handled by properly trained personnel. The number of accidents involving forklifts are normally not reported. Damage and loses are usually noted upon receiving by the consignee. This results in insurance claims thus causing loss of confidence to the shipper and loss of revenue due to delays, loss of time due to accidents and many more. Handling the forklift safety will ensure accident prevention prevails and that products are delivered in good condition and contractual obligation are fulfilled. The forklift should be handled properly so that its life span can be prolonged.
